

## Uniform Cleaning Instructions

Each student is responsible for the care and maintenance of the uniform assigned to them. The following are instructions for the laundering of the uniforms and cleaning of the masks and hat boxes.

The uniform parts may be washed together. Unsnap the jacket and pants hemming. Be sure to note the position they were in. Empty the garment bag and wash with the rest of the uniform, including the gauntlets. Be sure to remove the name badge from the garment bag and replace it afterward. Wash in cold water with a color-safe detergent (example: Woolite for Dark Fabrics). If the pants or jackets have stains, you may try a non-bleaching stain remover. The uniform can be dried on warm but must be pulled from the dryer immediately to prevent wrinkling. Do not iron.

The inside of the mask and the hat box should be wiped down and dried.
